HERBORT

FOOD PRODUCTION MACHINERY

ABOUT US

EXPERIENCE

Herbort has been producing machinery and production lines for the foodprocessing industry since 1919.

Thanks to years of experience Herbort has become an important player in the field of foodprocessing.

QUALITY

The design and construction of our machines is done by experienced specialists.

The production of our stainless steel machinery requires a high degree of expertise and is done in our modern facilities.

INTEGRATION

Toghether with our client we find the right solution for his specific needs.

This ranges from standard machinery, custom-made machinery to complete production lines.

CRATE TURNERS

Crate turners are used to lift and empty crates, pallets and containers.

CONVEYOR BELTS

Conveyor belts and elevators are available in different lengths and widths depending on the task and customer needs.

SORTING BELT

A sorting belt is a conveyor where workers can intercept lesser products and discard them in waste chutes. The conveyers are available in different lengths and widths depending on the task and customer needs.

Roller conveyers are also available to have a better view of the underside of the product.

PENTICUT

With this machine, various elongated products such as carrots, cucumber, leek, celery, rhubarb, beetroot (oblong varieties), headless asparagus, etc., are cut.

The capacity of carrots of 40 mm diameter is 3000 kg/ h and of potatoes of 40 mm is 6000 kg/ h.

WASHER

This machine is ideal for gentle and thorough washing of delicate fruit, tomatoes, salads or green vegetables.

BRUSH WASHER

Machine (model 815) is used for washing and peeling fruit and washing vegetables, such as potatoes, carrots, turnips, beetroot, celery, after their peeling. Within the trough an adjustable screw is placed to regulate the capacity or throughput.

VIBRATORS

The model 207 transport system, distributes, sorts, dehydrates, etc., using vibrations.

The decks are manufactured in various lengths and widths according to the requirements and performance.

FILLING MACHINE

This filling machine (model 561B) is suitable for filling cans or jars with loose or elongated products, such as plums, cherries, gooseberries, blueberries, half peaches, peas, carrots, green beans, onions and similar products in cans or jars.

CHERRY PROCESSING LINE

WASHER 048A

This washer 48A is used to wash almost all types of fruits and vegetables. It is especially good to wash products who need to be handled with care, like strawberries, cherries, grapes, mushrooms, and leafy vegetables.

This intensive but gentle way of washing is possible thanks to the pressurized flow of air that is blown into the washing container. If needed, this machine can be expanded with a sorting belt.

DESTEMMER 28BS/C

This machine (model 28BS / C) is used for the removal of the stems and washing of sweet and sour cherries, plums, olives, raisins, and also for the subsequent cleaning of beans pickles and onions. The capacity of fresh sour cherries with a full stem can amount to 1500 kg / h.

STONE REMOVER 27

These machines (models 27 A / F) are ideal for stoning products such as sweet and sour cherries, plums, apricots, etc.. For the processing of smaller products, the machine is equipped with a ontsteen drum.

The capacity for the type with drum is 1600 - 2400 kg / h and for the type with plated conveyer this is 1500 - 2200 kg / h.

SORTEERMACHINE 601E

This roller grader is suitable for precise thickness grading with cucumbers, Brussels sprouts, beetroots, carrots, cress, olives, gooseberries, plums, cherries and similar products. The machine is mainly made of stainless steel. The chassis is made of stainless, hollow profiles.

The increasing slope of the jacks in the roller grader, creates different sorting slots where the product is graded through, into gutters or onto conveyor belts
